## Geospatial Enterprise Operations (GEO)

With 15 different business lines, the Business Center can address equity through its operational support to the FSA, NRCS, and RMA, which administer farm programs.

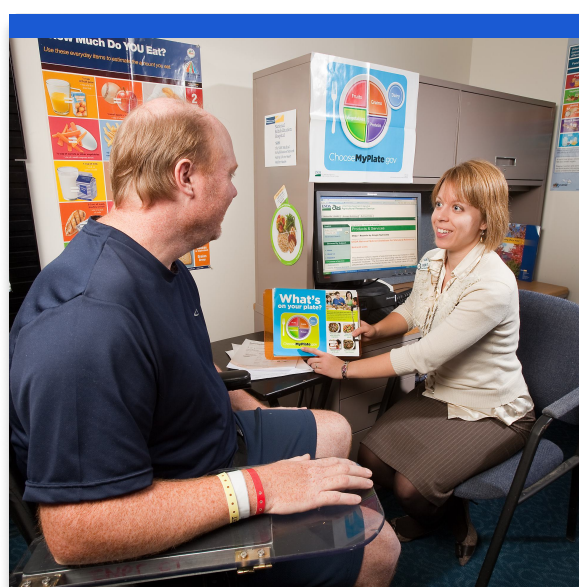

**USDA - Geospatial Data Gateway**

**NAIP - Current Year 2022: Available**

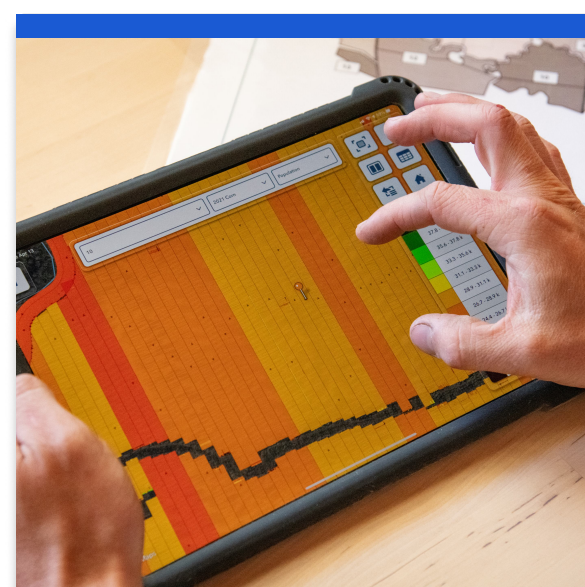

**Current Flying Year 2023: Not Available**

### Introduction

Geospatial Enterprise Operations, under the FPAC Assistant Chief Information Officer (ACIO), serves as an enterprise leader in the geospatial environment (creation, processing, management, and distribution) and in creating and maintaining the USDA's geospatial policy, governance, and enterprise strategic design in concert with FPAC strategy. GEO partners with FPAC, USDA, and other external customers to deliver some of the nation's most foundational geospatial information.

**Customer Service**

**Geospatial Data Management and Provisioning**

**Data Inspection, Enhancement, and Delivery**

**Geospatial Technology Coordination and Project Execution**

# Customer Service

Customer Services manages the public facing Customer Fulfillment desk. The team supports customers by assisting with research in determining the geospatial content specific to their need.

Content includes NAIP and historic aerial imagery. The team's daily activities include receiving research requests, creating customer orders, processing reimbursable collections, working with production staff, and managing product delivery. The team collaborates with the Production, Geospatial, and IT Services teams to deliver customer needs.

Aerial photography and digital orthophotography acquired by the USDA are in the public domain and are available to federal and state agencies, and to the general public through the Geospatial Enterprise Operations.

## Products

**CLU** – Common Land Unit is a county farm and tract boundary used to measure acreage and determine crop yield among other uses. This dynamic geospatial process is frequently updated to ensure dataset is current. Section 1619 (7 USC § 1619) of the 2008 Farm Bill restricts sharing of CLU data.

Requests for Common Land Unit (CLU) information can be sent to:

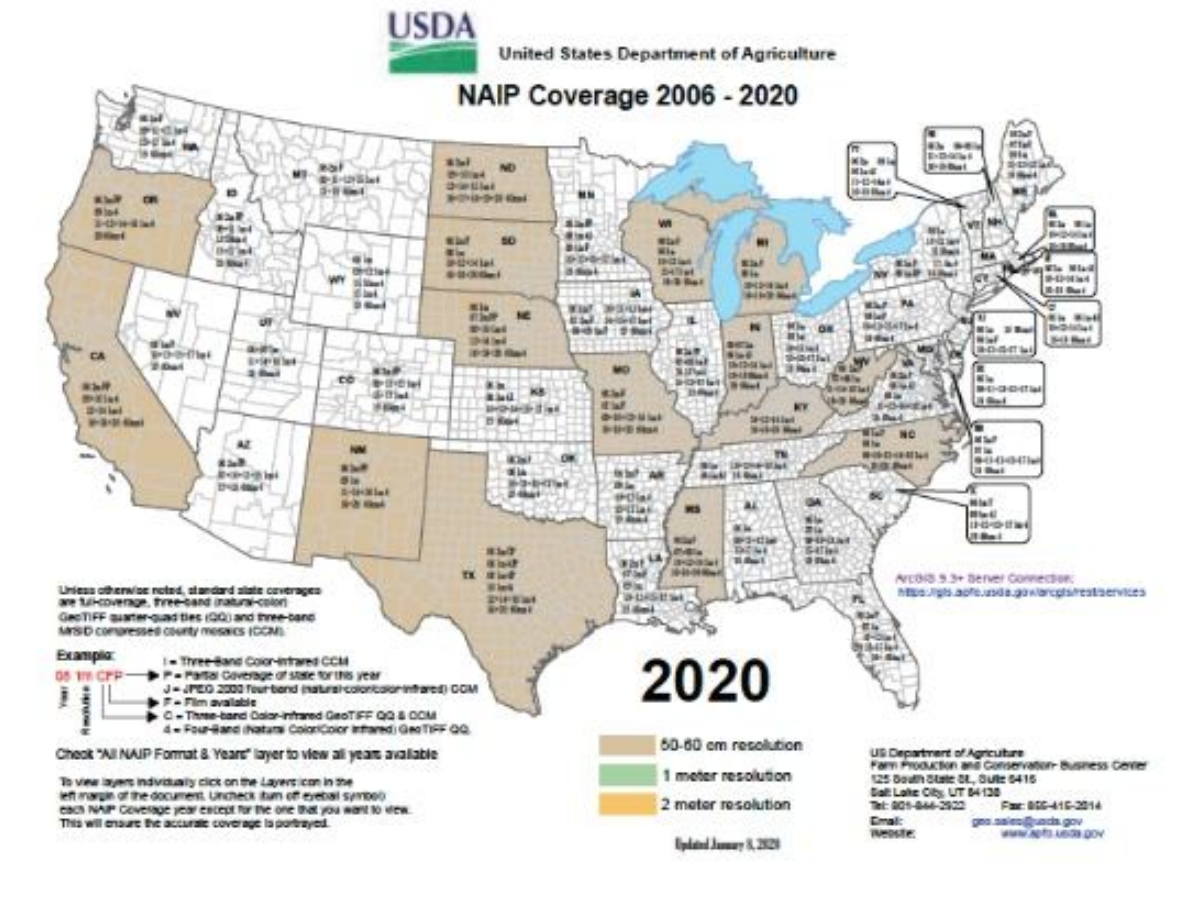

[SM.FP.FOIA@usda.gov](mailto:SM.FP.FOIA@usda.gov)

**Certification** – A letter stating official regulation and original film holdings location indicating aerial identification and date with state and county covered. Used for court cases and physically attached to aerial photographic reproductions. Also available is a standard Letter of Origin that can be provided without certification and includes the same information.

## Services

**Geospatial Data Research** – Is an innovative-systematic approach to verify and study GEO's geospatial holdings to increase the level of knowledge, awareness, and understanding the nature and availability of products and services available to support the FPAC mission and supports the following ordering activities:

# Customer Service

Customer Services manages the public facing Customer Fulfillment desk. The team supports customers by assisting with research in determining the geospatial content specific to their need.

Content includes NAIP and historic aerial imagery. The team’s daily activities include receiving research requests, creating customer orders, processing reimbursable collections, working with production staff, and managing product delivery. The team collaborates with the Production, Geospatial, and IT Services teams to deliver customer needs.

Aerial photography and digital orthophotography acquired by the USDA are in the public domain and are available to federal and state agencies, and to the general public through the Geospatial Enterprise Operations.

## Products

**CLU** – Common Land Unit is a county farm and tract boundary used to measure acreage and determine crop yield among other uses. This dynamic geospatial process is frequently updated to ensure dataset is current. Section 1619 (7 USC § 1619) of the 2008 Farm Bill restricts sharing of CLU data.

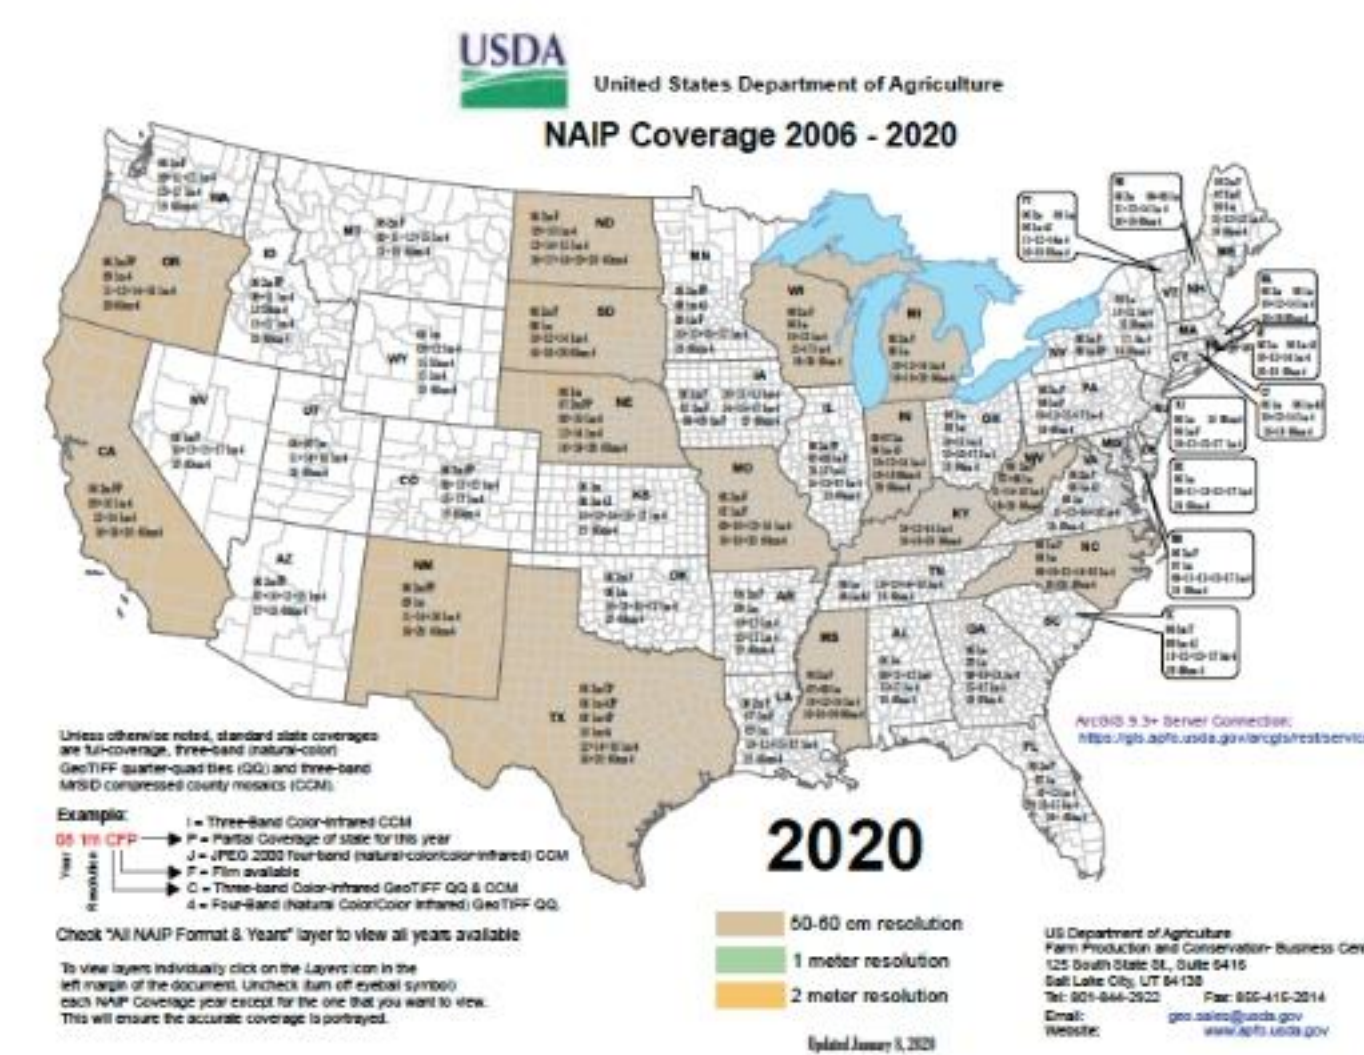

Requests for Common Land Unit (CLU) information can be sent to: [SM.FP.FOIA@usda.gov](mailto:SM.FP.FOIA@usda.gov)

**Certification** – A letter stating official regulation and original film holdings location indicating aerial identification and date with state and county covered. Used for court cases and physically attached to aerial photographic reproductions. Also available is a standard Letter of Origin that can be provided without certification and includes the same information.

## Services

**Geospatial Data Research** – Is an innovative-systematic approach to verify and study GEO’s geospatial holdings to increase the level of knowledge, awareness, and understanding the nature and availability of products and services available to support the FPAC mission and supports the following ordering activities:

- Aerial Coverage Determination
- Customized Photographic Reproductions
- Electronic & Media Delivery
- Georeferencing
